PROFILE SUMMARY

Enthusiastic and detail-oriented Full Stack Developer with a strong foundation in HTML, CSS, JavaScript, and hands-on experience with the MERN stack. Proficient in building responsive, user-friendly web applications and dynamic back-end systems. As a fresher, eager to contribute to real-world projects, continuously learn, and grow in a collaborative development environment.

PROJECTS

WanderLust-Stayhere – Stay, Explore, Experience
WanderLust-Stayhere is a rental web application inspired by Airbnb, where users can explore, list, and book stays. Built with a focus on UI/UX, it supports listings, reviews, and user authentication.

Student Management System – Role-Based Web Application
It has secure login for Admin, Student, and Teacher, enabling role-based access to manage profiles, attendance, results, and academic records efficiently.

Portfolio – Designs That Work & Inspire
A collection of responsive web projects built using HTML, CSS, and Bootstrap, showcasing my front-end development skills and eye for clean, user-friendly design.
